

Simulate an outbreak

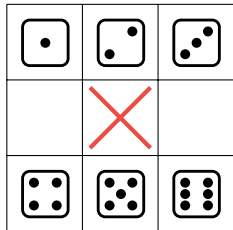

Each square is a person. Start with the grid on the left. Follow:

- Exposed become infectious:

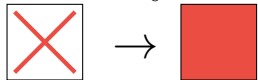

- Roll the dice 3 times.

Expose non-coloured squares according to:

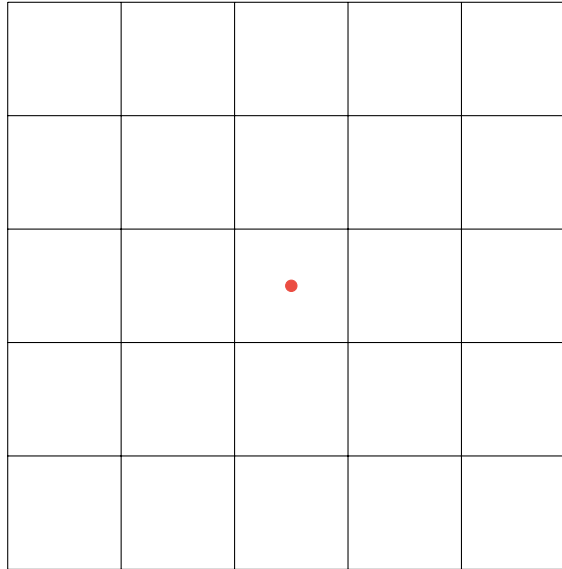

- Recovery:

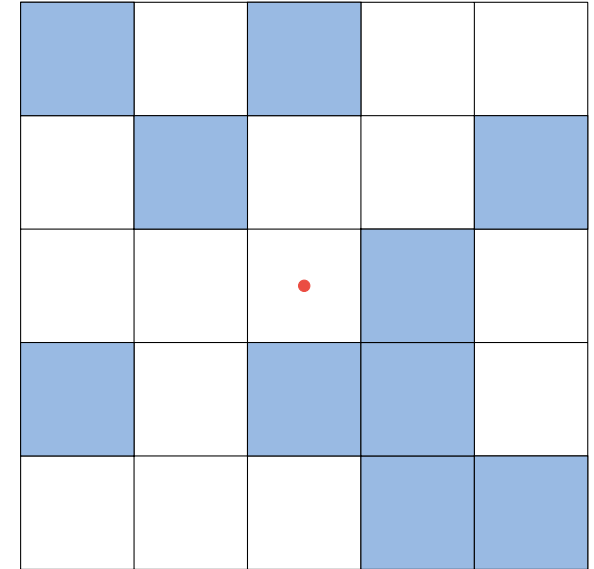

- Repeat until the spread stops.

Then do the same with the grid with blue squares. Blue squares could represent people sheltering at home, or vaccinated people.

No. of rounds before virus stops:	
No. of people who had the virus:	

No. of rounds before virus stops:	
No. of people who had the virus:	

Afterwards:

What did you notice?
